SECTION 4: FIRST AID MEASURES		
4.1 Description of first aid	d measures	
Eye contact:	Accidental spillage on the eyes should be washed off with plenty of water. If pain or irritation occurs, seek medical advice and show the package leaflet or the label to the medical practitioner.	
Skin contact:	Accidental spillage on the skin should be washed off with plenty of water. If irritation occurs, seek medical advice and show the package leaflet or the label to the medical practitioner.	
Inhalation:	Inhalation is highly unlikely due to the nature of the product and how it is packaged and administered. If irritation or difficulty in breathing occurs, seek urgent medical advice and show the package leaflet or the label to the medical practitioner. Remove the patient from the contaminated area. Lay the patient down, keep warm and rested.	
Ingestion:	Ingestion is highly unlikely due to the nature of the product and how it is packaged and administered. If swallowed, do not induce vomiting, seek medical advice and show the package leaflet or the label to the medical practitioner. Remove material and give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.	
4.2 Most important symp	toms and effects, both acute and delayed	
Eye contact:	Not expected to cause any effects.	
Skin contact:	Not expected to cause any effects.	
Ingestion:	May cause discomfort if ingested in large quantities	
See Section 11 for more detailed information		
4.3 Indication of immediate medical attention and special treatment needed Treat symptomatically.		

Version No: 1 Page 4 of 17

SECTION 5: FIRE FIGHTING MEASURES			
5.1 Extinguishing media			
Suitable:	Select extinguishing media suitable for surrounding area		
Unsuitable:	There is no restriction on the type of extinguisher which may be used		
5.2 Special hazards arisin	g from the substance or mixture		
Fire incompatibility:	Avoid contamination with oxidising agents.		
5.3 Special protective acti	ons for fire-fighters:		
Firefighting:	Use water delivered as a fine spray to control fire and cool adjacent area. Do not approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.		
Fire / explosion hazard:	Combustible. Slight fire hazard when exposed to heart or flame. On combustion, may emit toxic fumes of carbon monoxide.		

SECTION 6: ACCIDENTAL RELEASE MEASURES			
6.1 Personal precau	ns, protective equipment and emergency	procedures	
For information on pr	ctive equipment, see section 8		
6.2 Environmental F	autions		
See section 12			
	6.3 Methods and material for containment and cleaning up Spills are unlikely due to the nature of the product and how it is packaged		
Minor Spills:	Clean up all spills immediately. Place in a suitable, labelled container for waste disposal.		
Major Spills:	Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of the hazard. Contain and absorb spill with sand, earth, inert material or vermiculite. Prevent, by any means available, spillage from entering drains or water course.

SECTION 7: HANDLING AND STORAGE		
7.1 Precautions for safe h	andling	
Safe Handling:	Wear suitable protection gloves and clothing when handling the product. Always wash hands with water after handling. Observe manufacturer's storage and handling recommendations.	
Other Information:	Store at controlled room temperature 20-25°C (68-75°F) Do not freeze. Keep out of the reach and sight of children.	
7.2 Conditions for safe sto	orage, including any incompatibilities	
Suitable Container:	Light resistance bottle	
Storage incompatibility:	No known incompatibilities.

8.2 Exposure controls	
Appropriate engineering controls:	The basic types of engineering controls are: Process controls which involve changing the way a job activity or process is done to reduce the particular risk.
Personal protection:	
Eye and face protection:	Safety glasses with side shields / chemical goggles
Skin protection:	See hand protection below
Hands/ feet protection:	No special equipment needed when handling small quantities. OTHERWISE: Wear chemical protective gloves
Body protection:	Wear appropriate clothing
Other protection:	No special equipment needed when handling small quantities

SECTION 10: STABILITY AND REACTIVITY		
10.1 Reactivity:	See Section 7.	
10.2 Chemical stability:	Product is considered stable. Hazardous polymerisation will not occur.	
10.3 Possibility of hazardous reactions:	The product is not considered to be hazardous if used as per instructions. Hazardous polymerisation will not occur.	
10.4 Conditions to avoid:	Protect from light.	
10.5 Incompatible materials:	See section 7.	
10.6 Hazardous decomposition:	See Section 5.

SECTION 13: DISP	SECTION 13: DISPOSAL CONSIDERATIONS		
13.1 Waste treatmo	ent methods		
	Any unused veterinary medicinal product or waste material derived from such veterinary medicinal products should be disposed of in accordance with national requirements.		
	Legislation addressing waste disposal requirements may differ by country, state and/or territory. Each user must refer to laws operating in their area.		
	Recycle wherever possible or consult manufacturer for recycling options. Consult State Land Waste Management Authority for disposal. Bury residue in an authorised landfill. Recycle containers if possible, or dispose of in an authorised landfill.		
	Shelf life considerations should also be applied in making decisions of this type. Note that properties of a material may change in use, and recycling or reuse may not always be appropriate. Where in doubt contact the responsible authority.		
	Ensure that the disposal of material is carried out in accordance with Hazardous Products Regulations (Canada, 2015).
